Monica Botta is an landscape architect, she is specialized in projects for vulnerable users: Healing Gardens, Green Therapy Garden and Therapeutic Landscape Design.

She combines her profession with teaching activity, over the years, in the various institutes and faculties: Faculty of Architecture of Politecnico di Milano, "Master Planning, Programming and Design for health building ", Politecnico di Milano; Faculty of Agricultural and Food Sciences, Università di Milano; to the Master of Science in planning of green areas and landscaping of the Inter-Università di Genova; Scuola Agraria of Monza Park, and at the "Istituto Agrario Bonfantini" of Novara.

From this year she is co-director of the course of Therapeutic Landscape Design at Politecnico di Milano-Faculty of Architecture, enabled for specific training on healing gardens and green therapy.

She works designing, training, and looking for new solutions, as well as she is involved in the evaluation of green benefits; she is also co-deviser of a pilot project on Therapeutic Parks in Italy. It's designer for the firm Euroform – W.

She wrote many articles on magazines and on the web and is often called upon to bring her case histories in the various medical and scientific conferences and congresses which increasingly devote attention to these issues.

She is ordinary partner of the AIAPP - Associazione Italiana Architettura del Paesaggio affiliated to the IFLA - International Federation of Landscape Architects.
